

Cemec Material conveyor CFG 100

Material conveyors with two inputs for a permanent central vacuum system.

Primarily intended for the transport of plastic and rubber granulate matter. Can be used in a permanent central vacuum system or using a separate vacuum fan. Can be connected to most control systems. The CFG 50 R2, 100 R2 and CFG 200 R2 have two material inputs, allowing the transport of material from two alternating locations. Both inputs are closed by cylinders, when not used for transport. The vacuum grating is easily removed for cleaning.

CEMEC

- Two inputs allow mixing without the need for accessories
- Empty the mill and add fresh product
- The cover has hinges, no loose parts when cleaning
- Stable, stainless steel design

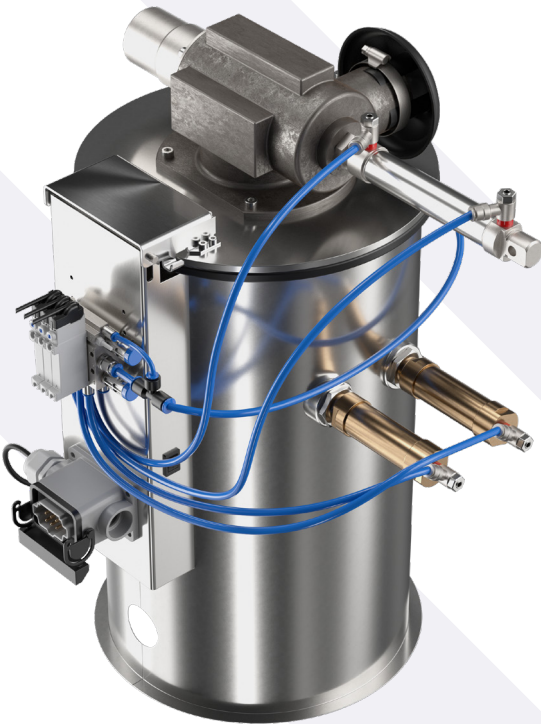

Can be
connected to
most control
systems
